

### Material List

- #22 gauge silver wire
- Pink nylon (or other colors as desired)
- Green nylon
- Stamens (small yellow and black/white)
- Light green floral tape
- Yellow floral tape
- Nylon thread
- #2 stem

# Tulip

1. Using silver wire, form three 2 -1 /4 inch diameter loops and three 2-3/4 inch diameter loops. Stretch the loops to elongate and create oval shapes

2. Wrap nylon around each loop. Make sure the nylon is as taut as possible without distorting the shape of the loop. Use nylon thread to tie off nylon at the base of the loop. Cut off excess nylon.

3. To make stamens, take three yellow small stamens, cut off one end. Tie the stamens together with yellow tape.

Attach stamen bundle to one end of a #2 stem wire with nylon thread.

Fold three black/white stamens in half. Tie the black/white stamens around the yellow stamen bundle with nylon thread. Then wrap yellow tape to cover up nylon thread.

4. **Assembly:** arrange the three larger petals around the stamen bundle, with the base of the petals near the stamens. Secure the petals with nylon thread.

5. Arrange the three smaller petals around the outside of the large petals. Secure with yellow floral tape (cover up nylon thread)

6. Flip the petals upward towards stamens

8. **Leaves:** use #22 wire and make two loops, xxx inches in diameter and xxx inches in diameter. Stretch the loops to long oval shape and wrap them in green nylon.

7. To further thicken the stem, thread a straw around the stem wire; wrap light green floral tape around the straw

9. Attached the two leaves to the stem wire with light green floral tape
